

## We continue challenging to make more reliable things in the fields of Water and Spase.

RYO KEISO, LTD has made a progress to build a high technology company in Nagasaki prefecture. Our basic policy is to combine "Electronics and Mechanics", "Hardware and Software". We have business with Nagasaki Shipyard & Machinery Works of Mitsubishi Heavy Industries, Ltd., the major japanese companies and the government and municipal offices. Moreover, we've put a great effort to develop our original products.

### Technical Cooperation

We contribute to the development of the instruments in the fields of Defense and Space. We design and manufacture the instruments, and we also do the periodical maintenance.

Control Units for the Defense Instruments

Sun Sensor Unit

M-V Rocket

### Our Original Products

Our company's motto is to reply to the needs of the customers and to provide our technology and services to the customers.

Agency Duties of Rate Tables made in ACUTRONIC

Instrument Construction & Engineering of the Power Plant and Wind Turbine.

### Original Brand

**Oil Bath Device**

It has high and low temperature tanks and calibrates a thermocouple of an airplane

**Boncarry**

It lifts a gas cylinder up and down from the ground level to the 300 mm height.

**Ladder Climber**

It is the elevator, which goes up and down a vertical ladder as gripping it directly.

**Cable Laying Method**

All cables of the windmill are raised at a stretch from the grand level to the top.
